BUSINESS BROCHURE

Empowering professions with skills and confidence
to accelerate performance.

www.corehexis.com

Who We Are

COREHEXIS is a 'Highest Industry Experienced' team for training and capability development organization committed to bridging the gap between education and real-world performance.

We believe skill is not taught it is built through structured exposure, guided practice, and real industry integration.

Our Vision

To become a trusted capability partner for industries, institutions, and emerging professionals across India and beyond.

Our Mission

- To deliver structured, industry-aligned training programs
- To build employability with measurable competency standards
- To create sustainable skill-to-placement pipelines
- To develop future-ready talent with confidence and clarity

What We Do

Capability Development at Every Level

From shop floor to leadership, we build performance-ready teams through industry-aligned programs.

Corporate Training Programs

Structured, role-based training programs designed for engineering and manufacturing professionals.

Industry 4.0 & Digital Transformation

Smart factory, IoT, digital twin, and data-driven manufacturing programs for the future.

Consulting & Capability Development

End-to-end consulting to build sustainable skill systems and performance frameworks

Training of Trainers (ToT)

Equip your internal trainers with world-class facilitation and instructional design skills.

Industry Readiness Programs

Bridge the gap between academic knowledge and real-world industry performance.

Behavioural & Soft Skills Programs

Communication, leadership, emotional intelligence, and performance culture building.

01 MECHANICAL ENGINEERING

Corporate Training Programs

Manufacturing Excellence

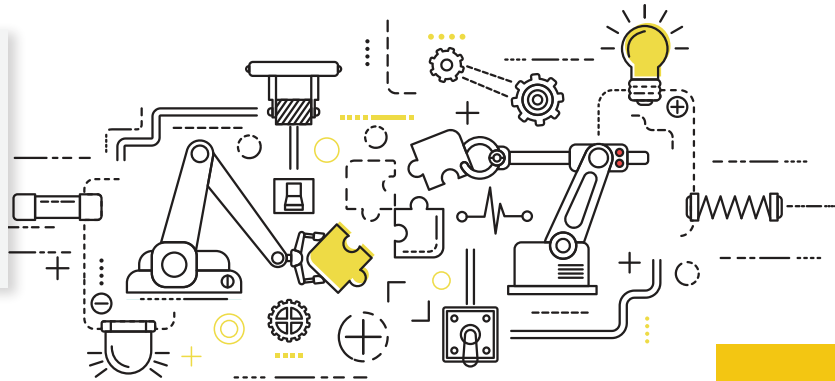

- Advanced CNC Programming (Turning, Milling, VMC)
- Lean Manufacturing & Kaizen Implementation
- Six Sigma (Green Belt / Black Belt)
- TPM & OEE Optimization
- Industrial Engineering & Productivity Improvement
- Root Cause Analysis (RCA) & 8D
- Process Validation & PPAP

Design & Analysis

- Advanced GD&T
- Design for Manufacturing (DFM) & Assembly (DFA)
- FEA using ANSYS
- Tolerance Stack-up Analysis
- PLM & Engineering Change Management

Industry 4.0

- Smart Factory & Digital Manufacturing
- Predictive Maintenance
- Digital Twin Concepts
- Industrial IoT for Mechanical Systems

02

ELECTRICAL & ELECTRONICS

Corporate Training Programs

Industrial Systems

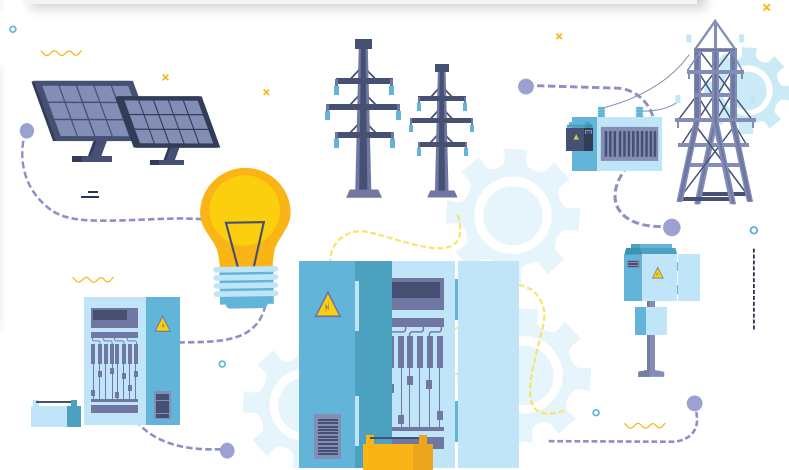

- PLC Programming (Siemens / Allen Bradley)
- SCADA & HMI Design
- Industrial Automation Integration
- VFD & Motor Control
- Power Quality & Energy Auditing
- Electrical Safety & Compliance

Electronics & Embedded

- Embedded Systems Design
- PCB Design & Testing
- Microcontrollers (Arduino / STM32 / PIC)
- Robotics & Mechatronics
- IoT Device Development

Emerging Technologies

- Solar PV System Design
- EV Technology & Battery Management Systems
- Smart Grid Technologies

03

AUTOMOTIVE

Corporate Training Programs

Core Automotive Engineering

- Automotive Systems Overview (Engine, Transmission, Chassis)
- Vehicle Diagnostics & Troubleshooting
- Automotive Electrical Systems
- ECU Basics & Calibration
- Hybrid & EV Technology
- Automotive Quality Standards (IATF 16949)

Advanced Automotive

- ADAS Fundamentals
- CAN Protocol & Automotive Networking
- Automotive Embedded Systems
- EV Powertrain Architecture
- Automotive Manufacturing & Assembly Line Optimization

04

CONSTRUCTION & INFRASTRUCTURE

Corporate Training Programs

Core Construction Skills

- Construction Project Management
- Primavera / MS Project Planning
- Quantity Surveying & BOQ Preparation
- AutoCAD for Construction Professionals
- Site Supervision & Quality Control
- Building Codes & Safety Compliance

Advanced Topics

- BIM (Building Information Modeling)
- Green Building & Sustainability
- Contract Management (FIDIC)
- Construction Cost Control
- Risk Management in Projects

05 PRODUCT DESIGN & ENGINEERING

Product Development

- Design Thinking & Innovation
- New Product Development (NPD)
- DFMEA & PFMEA
- Reverse Engineering
- Value Engineering

Digital Engineering

- 3D Printing & Additive Manufacturing
- CAD to Prototype Workflow
- Human-Centered Design
- Product Lifecycle Management (PLM)

06 IT & DIGITAL TECHNOLOGY PROGRAMS

Core Programming

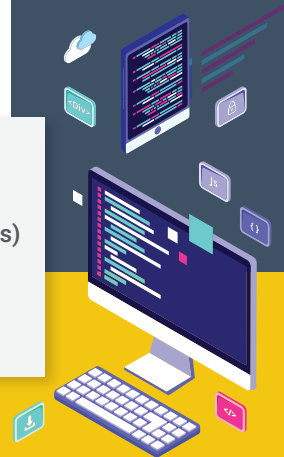

- Python for Engineers
- Full Stack Development
- SQL & Database Management
- API Development

Data & AI

- Data Analytics using Python
- Power BI / Tableau
- Machine Learning Fundamentals
- AI for Manufacturing

Cloud & DevOps

- AWS / Azure Fundamentals
- DevOps (Docker & Kubernetes)
- Cybersecurity Essentials
- ERP (SAP / Oracle) Overview

07

FUNCTIONAL CORPORATE PROGRAMS

Operations & Quality

- ISO 9001 & QMS Implementation
- Internal Auditor Training
- Supplier Quality Management
- Cost Reduction Strategies

Finance for Engineers

- Costing & Budgeting
- Project Financial Management
- CAPEX vs OPEX Decision Making

Supply Chain & Procurement

- Inventory Management
- Vendor Development
- Logistics Optimization
- Demand Forecasting

Sales & Business Development

- Technical Sales Skills
- Proposal Writing
- Negotiation Skills
- Key Account Management

08 TRAINING OF TRAINERS (ToT) PROGRAMS

Foundation ToT

- Adult Learning Principles
- Instructional Design Basics
- Session Planning & Facilitation Skills
- Managing Difficult Participants
- Training Need Analysis (TNA)

Advanced ToT

- Advanced Presentation Mastery
- Experiential Learning Techniques
- Assessment & Evaluation Methods
- Creating Engaging Learning Materials
- Digital Training Tools & LMS Usage

L&D Strategy

- ROI of Training
- Learning Analytics
- Competency Mapping
- Building Internal Academy Model

Technical ToT

- Technical Content Structuring
- Demonstration-Based Teaching
- Practical Lab Setup & Assessment
- Competency-Based Training Models

09 INTEGRATED INDUSTRY PROGRAMS (HIGH DEMAND)

- Lean + Leadership for Shop Floor Supervisors
- EV Technology + Safety + Diagnostics
- BIM + Project Management + Cost Control
- Industry 4.0 + Data Analytics + Problem Solving
- CNC + Drawing Reading + Team Communication

10 BEHAVIOURAL & SOFT SKILLS PROGRAMS

Core Behavioral Skills

- Self-awareness and emotional intelligence
- Attitude and mindset development
- Personal values and ethics
- Stress management and resilience
- Adaptability and flexibility

Interpersonal & Relationship Skills

- Teamwork and collaboration
- Building trust and rapport
- Conflict resolution and negotiation
- Networking skills
- Workplace etiquette and professionalism

Communication Skills

- Verbal and non-verbal communication
- Active listening
- Business communication (emails, reports, meetings)
- Public speaking and presentation skills
- Interpersonal communication

Personal Effectiveness

- Time management
- Goal setting and productivity
- Decision-making and problem-solving
- Critical thinking
- Accountability and ownership

Leadership & Management Skills

- Leadership styles and development
- People management
- Delegation skills
- Motivation and influencing others
- Coaching and mentoring

Workplace Readiness / Corporate Skills

- Corporate culture and behavior
- Business etiquette (meetings, emails, dress code)
- Customer service and client handling
- Workplace ethics and compliance

Change & Growth Mindset

- Managing change
- Innovation and creativity
- Continuous learning mindset
- Handling feedback and criticism

Diversity & Inclusion

- Cultural sensitivity
- Gender sensitivity
- Inclusive communication
- Working in diverse teams

Advanced / Specialized Topics

- Negotiation skills
- Crisis and conflict management
- Emotional regulation
- Assertiveness training
- Work-life balance
